WORK EXPERIENCE

Instart (*Akamai Technologies*) – Cloud App Solutions – Marketing Intern, *Palo Alto, CA* Jun 2019 – Aug 2019

- Improved website search ranking by altering HTML meta tags
- Oversaw and maintained marketing leads within Salesforce to push leads to SDR team
- Developed marketing campaigns and analyzed data from previous marketing campaigns
- Assisted in the development of new website marketing materials to increase traffic

Target Corporation – Retail Service Advocate, *San Jose, CA* Jun 2019 – Aug 2019

- Assisted in front end services, overseeing in-store transactions and customer experience

PERSONAL PROJECTS

YouTube Group Watch Party – youtube.anthonydamore.com Jun 2020

- Created a web app allowing users to create and share YouTube video watch rooms with their friends
- Added the ability for any viewer to pause, unpause, or change playback speed for all viewers in the party
- Leveraged the YouTube API to set up event listeners on user interactions with the video controls
- Utilized websockets to send video state to a NodeJS server, which propagates the video state to all viewers, thereby syncing their video controls to give the illusion of a single video stream that all viewers control
- Designed for scalability with minimal server load, since video content is served directly from YouTube

URL Shortener – url.anthonydamore.com May 2020

- Created a RESTful API to create and retrieve short URLs using a PostgreSQL database and NodeJS server
- Added a mobile-friendly front-end wrapper for the API using HTML, CSS, JavaScript and JQuery

Terminal-based C++ Search Engine Mar 2020

- Created a terminal-based search engine in C++ capable of crawling, indexing, and searching local files
- Implemented functionality for executing logical operators on the sets of matches for search terms

Sudoku Online Generator & Solver – sudoku.anthonydamore.com Jan 2020

- Developed an online Sudoku puzzle generator and solver, using HTML, CSS and JavaScript and JQuery
- Added features for custom difficulty games and auto-saving game progress to browser cookies

Hip-Hop Lyric NLP Analysis Aug 2019

- Utilized NLP to analyze inverse word frequency, revealing the most meaningful words in lyrics
- Graphically represented artist relationships through 27,000 pieces of metadata from over 2,000 songs

SKILLS & INTERESTS

Programming Languages (most to least proficient): Python, C++, Java, JavaScript, SQL

Interests: Data Science, Game Theory, Machine Learning, Artificial Intelligence, Statistics, Blockchain
